New At-Home Essentials for Hybrid Work

Enterprise SD-WAN Connectivity & Visual Collaboration

Making your home work experience “enterprise-class” requires a new approach to connectivity, security, and visual collaboration.

NWN Carousel’s **At-Home Essentials**, together with our leading technology partners, provides enterprise networking, connectivity, security, and visual collaboration capabilities you need to get the most out of your home office.

Benefits of the At-Home Essentials

- .01** | As a Cloud Communications Service Provider, NWN Carousel is the one point-of-contact for support
- .02** | We take on the operational complexity of establishing a full end-to-end solution with the ability to customize a user’s unique needs
- .03** | Bringing together People + Process + Tools to standardize the operations and support
- .04** | Dedicated broadband circuit with secure SD-WAN for the home office with cellular backup. Visual Collaboration solutions to optimize the At-Home experience
- .05** | Robust enterprise-class connectivity with high performance, reliability & security
- .06** | Intelligent Visual Collaboration micro-phones and cameras for equal participation
- .07** | 24/7 NWN Carousel’s award winning Managed Services

At-Home Hybrid Work Success Hinges on Connectivity, Collaboration, Compatibility

Network Connectivity and Endpoint hardware has proven to be a direct link to quality of experience as businesses focus to deliver a more predictable and reliable experience for users working at Home.

© 2021 TechTarget, Inc. All Rights Reserved.

Our new **At-Home Essentials** suite offers customers a way to purchase enterprise-grade SD-WAN for their home-based workers. Taking employees “off personal internet” and providing them with managed quality of service for voice, video and business applications to improve productivity and increase satisfaction.

At-Home Essentials is integrated with Cisco and Fortinet Security Gateways, solves for slow, unreliable internet connectivity and lack of security. Compared with the fast enterprise connections in offices, most home internet speeds are sluggish. Home networks are not reliable when competing for bandwidth with your family’s work, school and entertainment needs.

At Home Essentials also includes 24/7 the support your home-based workers need with quality Visual Collaboration Workspace solutions integrated with our strategic partners, Cisco and Poly. Our options include professional webcam and wireless speakerphone kits, as well as an all-inclusive collaboration desktop solution. Elevate the hybrid meeting experience with high-resolution desktop cameras, face lighting and advanced Visual Collaboration solutions such as speakers, mics, and headsets.

Add fully managed and supported Windows PCs with At-Home Essentials. Our Devices solutions integrate modern HP laptops and 2-in-1 hybrids with turnkey device management, and optional endpoint security. Our Customer Success Center provides around-the-clock IT support to end-users, regardless of location.

Enterprise-Grade Secure Connectivity + Visual Collaboration in the Comfort of your Home Office

NWN Carousel's **At-Home Essentials** suite helps minimize business disruption and provides an optimal end-user experience for home workers. We understand applications drive the business, influence user experience and create brand impression.
